

FOUNDATION CONTENT

Continuous Data
Set Theory
Sampling

Shapes,
Surface Area
and Volume

Right angled
triangles

Circles

Number
Theory,
Indices and
Surds

Standard form

Ratio

Graphs

Proportion and rates of change

11

Probability

Cartesian
Grids
Sequences
Inequalities

Congruence and
Similarity

Construction
of polygons,
Angles and
Areas

FDP
Estimation
Proportional
Reasoning

Discrete and
bivariant data

Expression
Equations
and
Formulae

10

Place Value
Four operations

Roots
Operations
Directed numbers
Fractions

CROSSOVER EXAM PREP CONTENT

Solving Geometric Problems

Functions and advanced graphs

Continuous data
Set Theory
Sampling

Advanced drawing
measuring and construction

Congruence and similarity
